

Implement a program that scrapes a website/websites for information regarding the 22 major arcana Tarot cards.

Will have options for each of the 22 cards and when clicked, will return information regarding that card.

Ex:

Input: The Fool

Output:

Description: The Fool depicts a youth walking joyfully into the world. He is taking his first steps, and he is exuberant, joyful, excited. He carries nothing with him except a small sack, caring nothing for the possible dangers that lie in his path. Indeed, he is soon to encounter the first of these possible dangers, for if he takes just a step more, he will topple over the cliff that he is reaching. But this doesn't seem to concern him - we are unsure whether he is just naive or simply unaware. The dog at his heels barks at him in warning, and if he does not become more aware of his surroundings soon, he may never see all the adventures that he dreams of encountering."

Upright: beginnings, freedom, innocence, idealism

Reversed: reckless, careless, distracted, naive, foolish, gullible, stale, dull

Numerology: Zero

Element: Air

Astrological Body: Uranus
